

The system has two main locations it needs to operate. Kitchen and Cashier Terminal. Both require a different set of hardware + technology. The category is organized based on what each section should know. Most of these are subject to change as needed.

Kitchen

Tablets - No

Touch screen - No

TV Screens, connected and logged into the system as display Mode?

Orders are displayed onto TV's.

How are you supposed to mark an order as completed?

Orders will be marked as complete when the ticket is printed. Meaning once the item is made the ticket of the order is placed on the item. If a order is in need of remaking it will appear automatically after the current order is finished

1x device to print tickets (subject to adjustment)

2x monitors/tv's (connecting method undetermined)

Cashier Terminal - The main software terminal (meaning where you can login change users and so fourth) is the cashiers computer

Tablets - Yes

Touch screen - Yes

1x Tablets - Yes, one to allow customer to confirm order on the tablet and continue

1x Chip Reader/Any payment processor

1x Receipt Printer

1x Terminal Touch screen - Yes

1x Main Cashier Unit ("Normal" machine hosting the application + the controller of the accessories. Comes with cashier box meaning ability to open drawer through system - Subject to change)
