

Title of Graph	Type of Evidence	Evidence Strongly Supports Claim	Evidence Partially Supports Claim	Evidence Strongly Refutes Claim
Graph 1 (Global Fossil Fuel Carbon Dioxide Emissions)	CO2 Emissions	True, Shows increased release of CO2 by human caused events		
Graph 2	CO2 Ppm	True, Corresponds with Increased PPM in the atmosphere with increased emissions		
Graph 3	CO2 Bubbles in Ice Cores	True, CO2 bubbles directly correspond to increased CO2 concentration		
Graph 4	Global Temperature	True, Global temperature increases in proportion to Human caused CO2 emissions		
Graph 5	CO2 Emissions, CO2 PPM, CO2 Bubbles in Ice Cores	Correlates Emissions PPM and Bubbles to present a sharp correlation between all data types
