

Calculus of One Variable I

MATH 1060 — Section 001 — Spring 2020

Instructor Information

Stephen D. Peele Jr.

School of Mathematical and Statistical Sciences

Email: speelee@g.clemson.edu

Web: <http://speelee.people.clemson.edu>

Mailbox: Martin Hall O-100

Phone: (864) 656-2730

Office: Martin Hall O-5 & O-109

Office Hours: By appointment – please email to arrange.

Note: This is a supplement to the general course syllabus which is specific to the listed sections of MATH 1060. It does not supersede the general course syllabus. Please refer to the general course syllabus for further details.

Meeting Time & Location

Please refer to your schedule for meeting time and locations. In the event that I am more than fifteen (15) minutes late, class is considered canceled for that day.

Class Structure

Class begins promptly at the scheduled time. If you are running late, please enter the room and quietly find a seat. In general, my preferred format is split the class into lecture and learning activity components.

General Expectations

- Be honest.
- Be respectful of others.
- Be invested in your success from day one.
- Use professional language in the classroom.
- End conversations when class starts.
- If you must leave early (non-emergencies), let me know before class starts.

Communication

Important information may be communicated via email, Canvas, or in-class announcements. You are responsible for any information conveyed in-class, through email, or through Canvas.

Cell Phones & Other Technology

For your benefit and the benefit of your peers, cell phones should be away during class. Should you wish to use your laptop or tablet in class, its use must be strictly relevant to the particular day's lecture. Please do not work on homework or other coursework while in class. Please remove earbuds, headphones, and AirPods during class. If you are using technology to help you complete assignments, you are prohibited from simply copying answers or work that is not your own. *I do reserve the right to dismiss you from class, assign a grade of zero on the assignment due that day, or both, for misuse of cell phones or other technology during class.*

Attendance

To be successful in this course, you must regularly attend class. Excessive absences (8+) may result in you being dropped from the course. Attendance may be tracked through a variety of means. If you must be absent, you are responsible for all information that you missed that day. Please consult with another student to obtain any missed information. I do not use office hours to teach missed information due to absences.

Grading Structure

This is a standard letter grade course graded on the typical ten-point scale. Additionally, this course has a minimum passing requirement (see general course syllabus).

Unit Exams	60%	Three unit exams will be administered on the following Wednesdays: February 5, March 4, and April 15.
Final Exam	20%	The cumulative and <i>mandatory</i> (no exemptions) final exam is scheduled for Monday, April 27 , from 11:30am – 2:00pm . The location will be announced. <i>Note: The final exam must be taken at the scheduled time and date. Do not make any end-of-semester arrangements (travel, move-out, etc.) that may conflict with this.</i> Your score on the final exam may replace your lowest unit exam score.
MyLab Math	10%	Homework is delivered through the MyLab Math online platform. An access code is required. You will register using the section code pee1e25825. It is your responsibility to keep up with due dates. The lowest three (3) scores will be dropped at the end of the semester.
Section Work	10%	Section work is composed of learning activities, attendance grades, quizzes, written homework, and any other assignment that I may choose to give at my discretion. <i>I intend to grade all assignments, but on occasion, I reserve the right to not grade an assignment.</i> The lowest three (3) scores will be dropped at the end of the semester.

Disclaimer: The non-examination components are not necessarily a reliable predictor of the final course grade.

Make-Ups & Late Work

In general, make-ups are not given and late work is not accepted. If you have a valid excuse for your absence (with documentation), you are excused from any associated assignments that were due. If your absence is not excused, you will receive a zero. Plan for the unexpected!

Exams & Academic Access

Exams are administered on **Wednesdays** from **5:30pm – 7:00pm** on the scheduled exam date (location TBA). The use of calculators or any electronic device is prohibited on all examinations. If you have an Academic Access Letter, please transmit the letter to me no later than one (1) week before the first exam. Scantrons will be provided for you. *If you must be absent for an exam, you must let me know as soon as possible.* To compensate you for your time on exam nights, class does not meet on the **Friday** following an exam.

Academic Integrity

All students must abide by the Undergraduate Academic Integrity Policy. We have zero tolerance for academic dishonesty in any form and will pursue formal charges for all cases of suspected academic dishonesty. Be advised that the penalties for academic dishonesty at the university level can be harsh.

Academic Calendar

Please refer to the Spring 2020 Academic Calendar (linked in Canvas) for important dates and deadlines.
