Hi my name is Gavin McRoy. I am a senior computer science major eager to get hands-on experience in the industry. My motivation for taking this class is to expand and utilize my current knowledge to solve real-world problems. My skills involve C/C++/Java/C# and many other OOP languages. I'm also familiar with Jetbrain tools, Adobe, Unity C#, and source control in team environments. I've created many small games, managed websites, and worked with many teams of around 5-7 people.
